

ORACLE

So now what? A collective approach to the cookie conundrum

Scott Kozub

Head of Identified Data Products

Oracle Advertising

Today's speaker

Scott Kozub

Head of Audience Product,
Oracle Advertising

The way we live is **changing.**

Consumer privacy
is taking center stage

The ability to rely on individual identifiers for activating digital media is eroding.

However, marketer's fundamental needs remain **unchanged.**

Marketers will always need to...

**reach relevant
people**

**at the
right time**

**in the right
environment**

**with messages
that resonate**

There's no shortage
of thoughts on this
space right now

The path forward

- Audience identifiers attached to real people designed to operate in a consumer-centric ecosystem
- Contextual intelligence that enables anonymous reach based on page content and consumer mindset

Audiences

Identifiers attached to real people designed to operate in a **consumer-centric ecosystem**

Contextual Intelligence

Anonymous reach and adjacency based on **page content and consumer mindset**

New Targeting Solutions

Privacy first approach to **improving contextual intelligence through data**

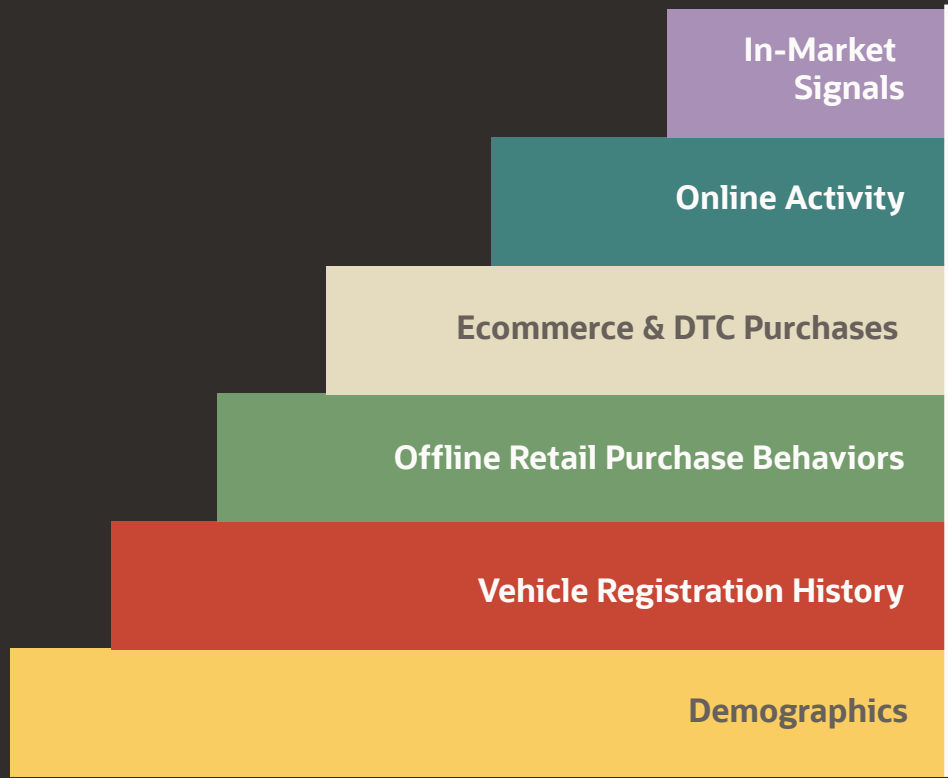

Reaching relevant people through digital audiences requires three building blocks

Platform Integrations

Identity Resolution

Data Signal Gravity

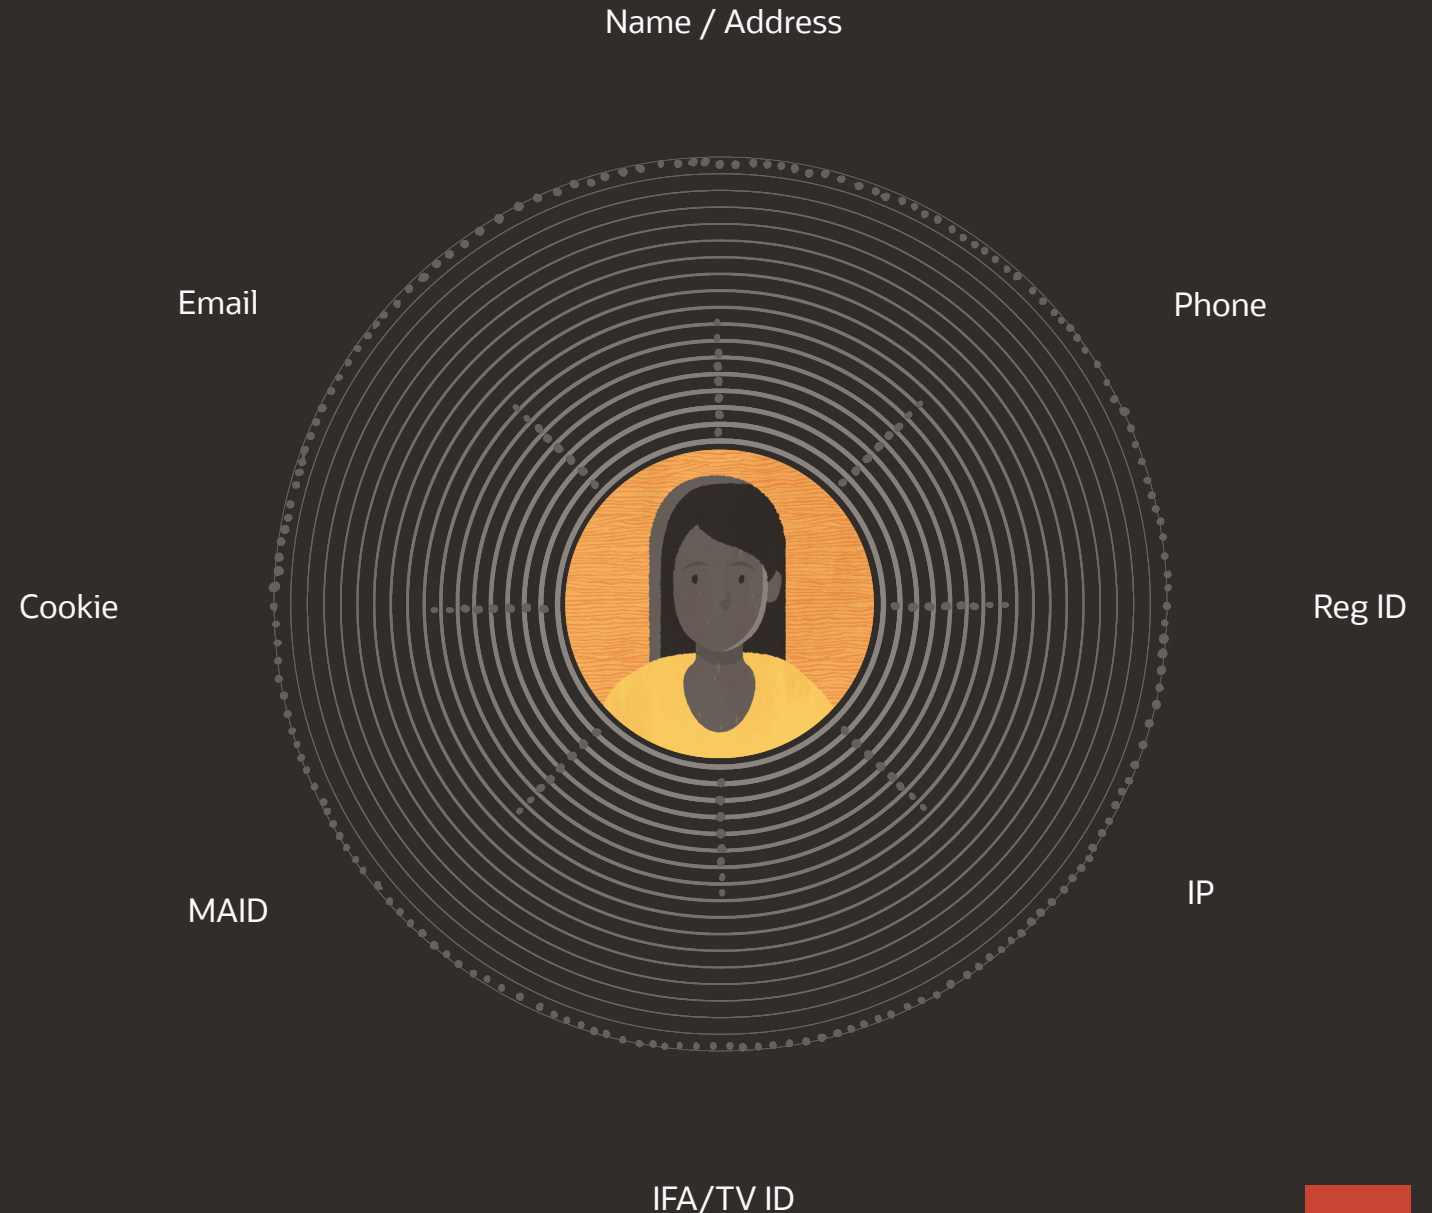

Use consumer-centric, enduring data assets that help you reach real, relevant consumers

Past behavior data and attributes

The Oracle ID Graph, comprised of 115MM households, ties real people across devices and channels

Even without the use of cookies and
MAIDs, Oracle can help you reach
over **99%** of people in the US-based
Identity Graph

Integrations are needed to deliver you audiences anywhere

Social Platforms and Commerce Sites

Media and Entertainment

DSPs and DMPs

Oracle Advertising is well positioned for the evolution of 3P audiences

Audience Creation

1st Party Data

CPG Loyalty Cards

Retail Purchases

Vehicle Registration

Demographics

Online Behavioral

80%
of our audience volume is sourced from offline data

Identity Resolution

Registration based linkages are already used to connect into much of the digital eco-system

Audience Delivery

Social Platforms

Commerce Platforms

Streaming Audio

Connected Television

New identifiers and solutions are needed to reach known consumers through the open internet

Open Web Desktop

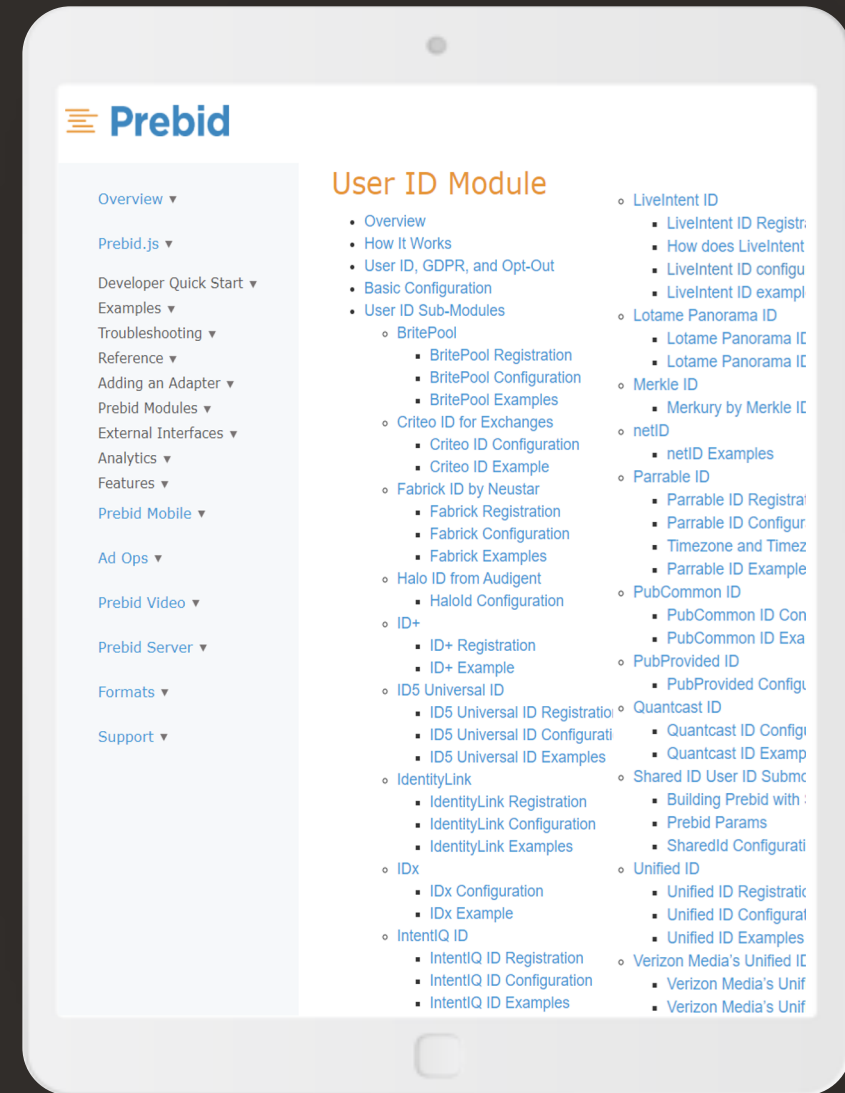

Mobile Browsers

It seems everyone is creating their own ID namespace now

We will not add to the noise but remain agnostic with principles.

Audiences

Identifiers attached to real people designed to operate in a **consumer-centric ecosystem**

Contextual Intelligence

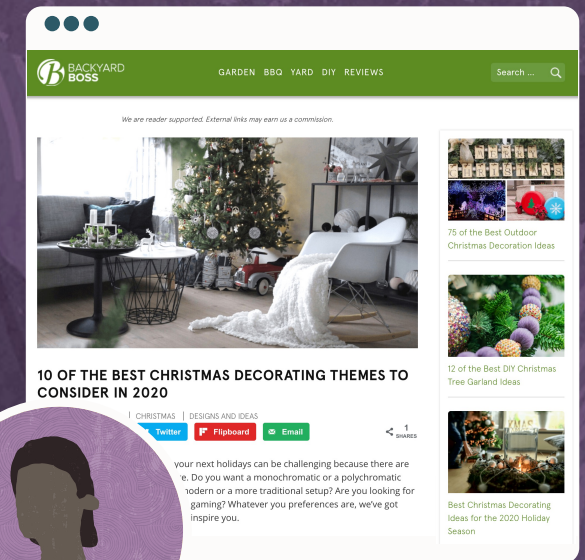

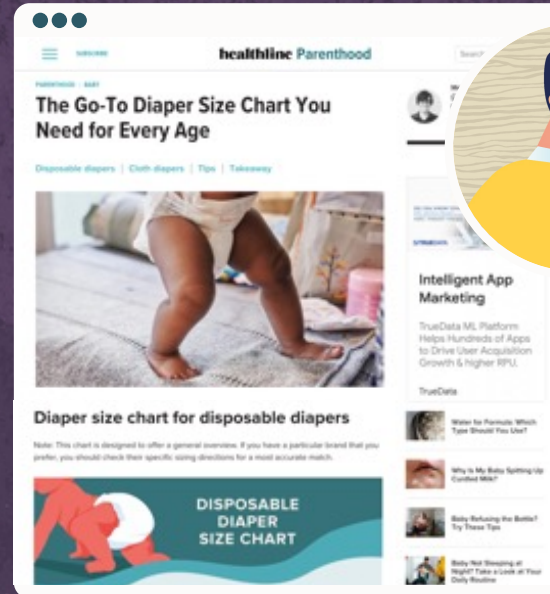

Anonymous reach and adjacency based on **page content and consumer mindset**

New Targeting Solutions

Privacy first approach to **improving contextual intelligence through data**

Contextual Intelligence allows you to target important mindsets and life moments

Contextual Intelligence
understands and activates across
trillions of browser-agnostic
content across the addressable web

57%

Mobile web inventory
unreachable via ID
targeting

A diversified approach
poised to meet the needs
of today's modern
marketing organizations

Expand audience usage **cross channel**

Assess **enduring** audiences

Test new **identity solutions**

Utilize **contextual intelligence**

Audiences

Identifiers attached to real people designed to operate in a **consumer-centric ecosystem**
