Executive management experience with national and international organizations.

Leader of large-scale, transformational initiatives with 3 multi-billion, multi-national companies.

Skilled at re-inventing and redefining strategies for multi-channel complex marketplaces.

Agenda

VoC research findings:

- *4 universal truths* about optimal CX
- 7 essential points in the lifecycle where customers expect value and personalized engagement.
- How Shinola used customer insights to reinvent their customer experience and increased repeat purchase rates 25%.

MSC Industrial Case Study:

- Your customers shouldn't have to tell you what's keeping them up at night.
- The more the world goes digital, the more important (trusted) people become.
- Trust leads to CSAT, then to loyalty, and ultimately to higher lifetime value.

Consider this:

Given the stress and uncertainty of coronavirus, all the previous wishes customers had for CX and meaningful relationships are being pushed to *far higher levels of expectation.*

Per VoC research: this dark time is an opportunity to demonstrate: unshakeable trust, authentic human understanding, empathy, and truly personalized engagement, to support customers.

VoC Interviews uncovered *4 universal truths* about optimal CX

The trek is clear: It takes commitment, a holistic view of the customer experience, and a change in the corporate mindset.
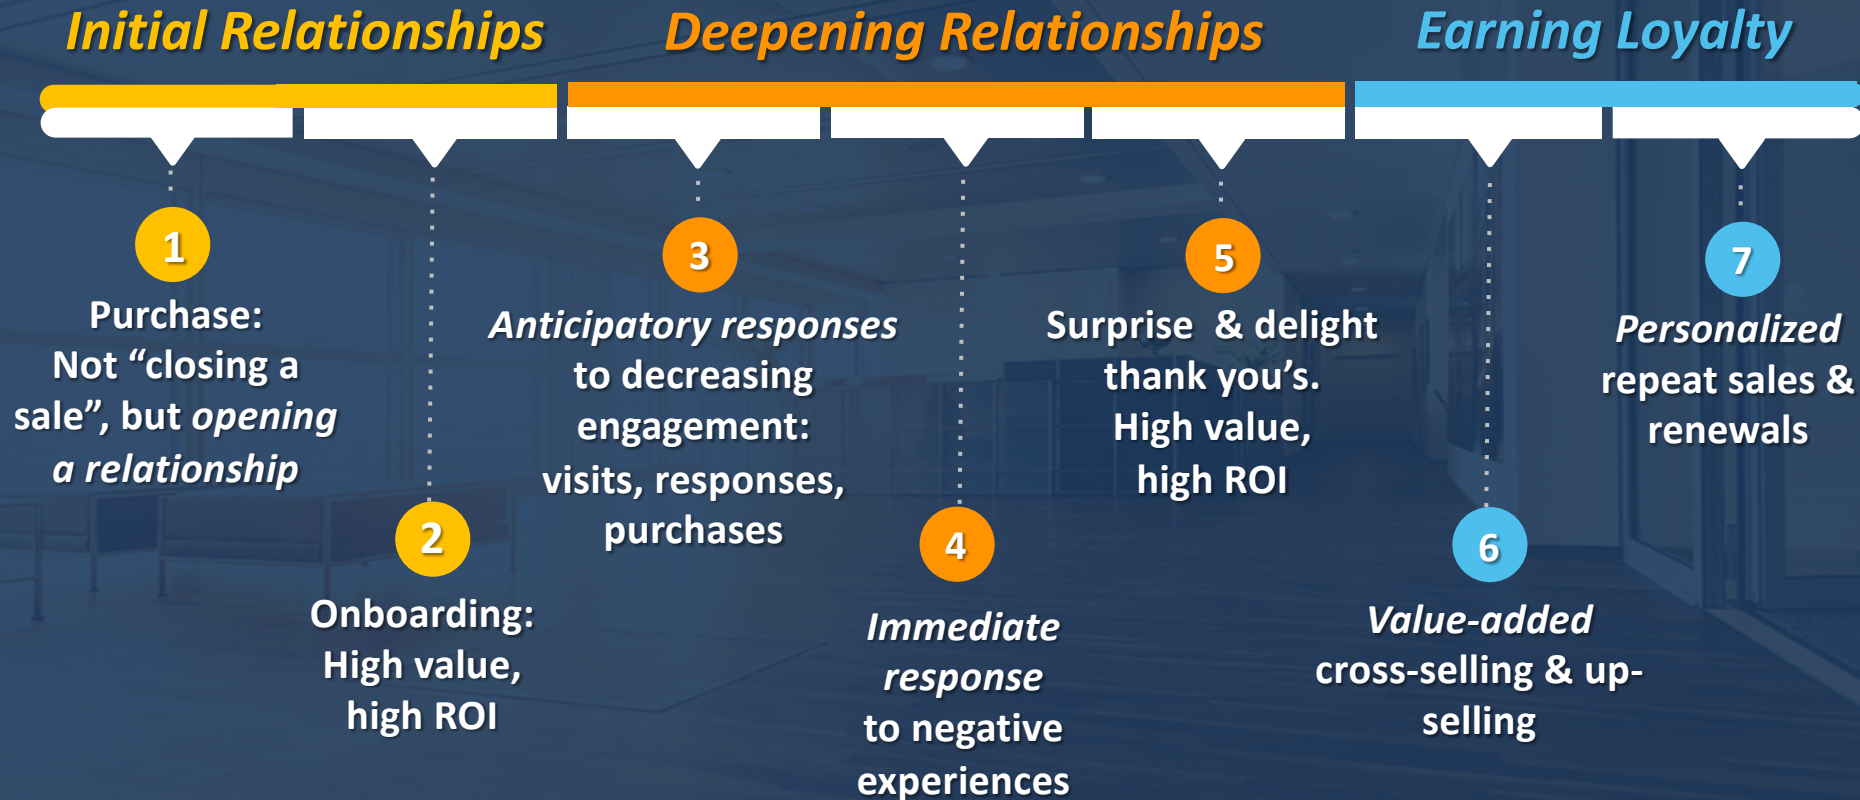

There is a **dangerous chasm** between the CX fantasy of brands vs. the reality that people experience.

Consumers have **unprecedented expectations** when it comes to CX. When the reality fails to meet expectations, they move on to find it with another company.

In spite of privacy concerns, customers **are willing to provide deep preference data** in exchange for true *personalization and customization.*

True personalization requires a **shift from Inferred data to Explicit data:** *Self-profiled preference info* customers provide in Preference Centers/dialogue boxes, etc.

Essential Engagement at 7 Critical Points in the Customer Lifecycle

Initial Relationships

Deepening Relationships

Earning Loyalty

1
Purchase:
Not "closing a sale", but *opening a relationship*

2
Onboarding:
High value, high ROI

3
Anticipatory responses to decreasing engagement: visits, responses, purchases

4
Immediate response **to negative experiences**

5
Surprise & delight thank you's. High value, high ROI

6
Value-added **cross-selling & up-selling**

7
Personalized **repeat sales & renewals**

Case Study:

MSC

Situation → In a fragmented market, MSC wanted to gain greater market share and create deeper relationships.

**Actions** → MSC collected customer feedback, used these insights to create a better way to connect with customers, and implemented their new program.

Shinola Goal

Evolve the Foundry "loyalty" program in order to establish a deeper relationship with guests by:

- Recognizing them regardless of channel

- Including them in experiences that are aligned to Shinola's brand

- Continuously providing guests with surprise and delight moments to show them appreciation

RUNWELL

CASS TOTE

CLOCKS

BICYCLES

JOURNALS

Conduct one-hour interviews to gain an in-depth *qualitative understanding* of how Shinola guests define their *expectations of value and engagement* from the Foundry loyalty program and brand.

Specific VoC Objectives were to gain *deep and actionable* insights regarding:

- Perceptions of Shinola and reasons guests buy from Shinola.

- Experiences that enhance or hurt the relationship and the brand.

- Shinola Foundry program perceptions/expectations.

- Detailed recommended improvements to Foundry: benefits, experiences, services and levels.

- *Value exchange expectations* regarding guest's willingness to self-profile preferences in exchange for increased personalization and value.

VoC Learnings

Exceptionally Engaged Guests

- Engaged customer base
- Strong connection to the brand
- Strong views regarding *what is brand appropriate and what is not*

....

Omnichannel Experience

- Guests must be able to access and utilize loyalty benefits across multiple channels

Curated Relationship

- *Curate your relationships as carefully as you curate your products and brand!*

....

Experiential ROI

- Do not rely on just on traditional ROI

....

Surprise and Delight

- Important and highly valued

Shinola guests emphatically stated that a traditional loyalty program would be *inconsistent and damaging* to their perception of the brand and its core values.
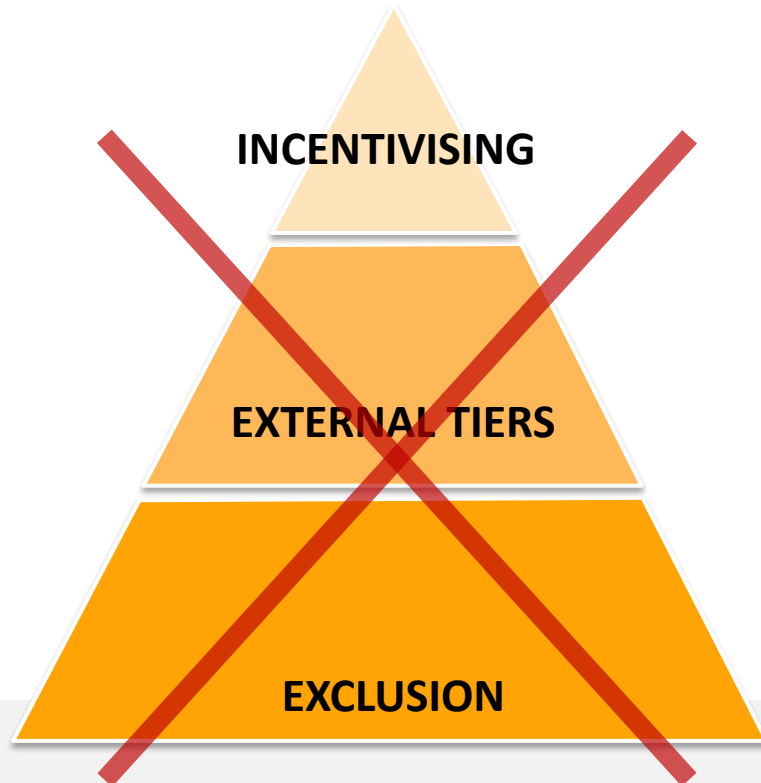

VoC research identified 4 powerful expectations which became the "value propositions" and served as the core of the benefits and experiences Shinola provides guests.

Simplified Structure & Definitions

Increases from New Loyalty Strategy:

"Since we fundamentally reengineered our Foundry loyalty program per the insights from the VoC research, we have seen Foundry member repeat purchase rates increase by over 25% and increased our "Leaders" group by 100%."

Shannon Washburn
President, Shinola

Essential for True Personalization: Explicit vs. Implicit Data

Consumers want unprecedented control of their CX and personalization.

The Challenge:

Requires transformation of data strategies.

Implicit Data

Explicit Data

Data re: short-term interests or needs

Self-profiled preference information

Implicit data: Information you data mined, or the customer provided, to indicate *short-term interests or needs,* but not to intentionally indicate deeper or longer-term preferences.

Explicit data: *Self-profiled preference info* customers provide in the Preference Center of a site or through dialogue boxes. Examples:

- Self-described personality type, attitudes, life stages
- Issues, needs, expectations
- Decision-making process
- Message and media preferences/aversions

B2B Opt-In Preference Profiling

The customers in this company's VoC indicated their willingness to provide detailed levels of preference data resulting in this comprehensive set of guidelines for progressive profiling.

Contacts

- Primary contact
- All others who interact with the extraprise's products who should have contact information *(Only if primary sees this as helpful)*
  - ➢ Management
  - ➢ Purchasing
  - ➢ R&D/Engineering
  - ➢ Production
  - ➢ Operations
  - ➢ Safety/QC
  - ➢ Marketing/Sales

Communication Preferences (by contact)

By situation:
- Daily maintenance
- Problems/issues
- Consultation/ problem resolution

Be sure to gather what their preferred method of communication is for each situation: they may want email for most things, a call when there are problems, and a video conference for consultation.

- Email
- Texting
- Online chat
- Direct messaging
- Phone
- Video conferencing
- In-person (once appropriate)

Communicate with them based on their **individual** preferences

Purchase History

- What they buy and why
- How often they buy and why
- For which end products they buy
- The importance of the products they buy to their production/products
- The level of investment in the products they buy

Understanding the "**why**" behind the "what" helps you better serve them, especially when there's problems

Your Customer's Customers

Learning your customer's customers is an important part of knowing/understanding them.

- Who are they primarily selling to?
- Where are their customers located?
- Are there segments they are targeting for growth?

Company

- Understand the company, how it operates, key players, where it has locations, its goals and objectives, etc.
- Awards, notable achievements, etc.

Products

The products and services the customer sells and is known for

Industry

- Learn about the industry
- How regulated is it?
- Who are their primary competitors?
